

IIOT, BIG DATA & ASSET MANAGEMENT

The Current State

- Different Layers of business are data siloed
- Significantly time-consuming to get holistic picture of assets
- Significant reliance on manual methods for planned and preventative maintenance

Business Management

Business Planning & Logistics

Manufacturing Operations Management

Batch Control

Continuous Control

Discrete Control

The IIOT State

- Your complete plant transmits data about every aspect of its operation to cloud based platform
- Different aspects of operations can be co-related easily
- Asset Uptime will be significantly increased due timely asset maintenance
